Gnosis by Lesaffre

Gnosis was founded in 2018 with the acquisition of Gnosis Advanced Biotech by the Lesaffre Group, which then merged this entity with Lesaffre Human Care.

Our expertise in human health and wellbeing is the result of Lesaffre's expertise in yeast production and fermentation, Gnosis Biotech's innovative knowledge of active molecules for human health care, and, most recently, the scientific expertise of NattoPharma.

As an innovative biotechnology company, we are specialized in developing, manufacturing, and selling active ingredients, nutritional yeasts, probiotics, and prebiotics, for pharmaceutical and nutraceutical industries.
